

January 9, 1974

I understand Senator Kremer that there are two amendments to the committee amendments. Those should probably be handed first. Are you ready to discuss those? To be in proper order here we should discuss the amendments to the committee amendments first. If you would go ahead with those I think that maybe somebody else might want to speak on these.

CLERK: Read amendments.

SENATOR KREMER: Mr. Chairman this amendment to the committee amendments was suggested by the Department of Roads and changes the payment of the disconnection of electrical service which would include the loss of revenue. It strikes that and it is only for just compensation for that which can be justified. I move the adoption of this amendment to the committee amendment.

SPEAKER: Any discussion, Senator Whitney?

SENATOR WHITNEY: May I ask Senator Kremer a question? Is this compensation that the state would pay, is that just in case the state acquires the land or does it have something else to do besides that?

SENATOR KREMER: If and when Senator Whitney if I understand it the directive was given to the dismantling of a sign that the electrical people that are supplying the electrical services to the sign, they are to be reimbursed for the disconnection of the electrical service, if and when the department of roads under the federal highway sign act is put into operation if they take them down, then the electrical company will be paid for the justified disconnection services.

SENATOR WHITNEY: OK.

SPEAKER: Is there any further discussion of that amendment to the amendment? If not, are you ready for the question. All those in favor of the amendment to the amendment say aye those opposed no. The amendment is adopted. Now is there another amendment to the amendment. Senator Kremer.

CLERK: Read amendment.

SENATOR KREMER: Mr. Chairman this amendment to the committee amendment merely changes the program from a mandatory program to a discretionary program. In otherwords the department of roads on the original committee bill permits this to be a mandatory operation. This then changes it to a discretionary program. I move the adoption of the amendments.

PRESIDENT: Any further discussion of that amendment? Question is shall the amendment be adopted? All those in favor of the amendment say aye, those opposed say no. Amendment is adopted. Are there other amendments?

CLERK: That is all Mr. President. Now the Committee Amendment.

PRESIDENT: Now we have the committee amendment which has been amended twice, is that the Chair's understanding?

CLERK: Right.

SENATOR KREMER: Mr. Chairman I move that the committee amendments as amended be adopted.
